

# STATE CAPITOL NEWS

By MELVIN LORD  
(United Press Staff Correspondent)

SACRAMENTO, March 14 (UP)—California's 51st legislature can chalk down only one definite accomplishment after the first week of the second half session—both houses passed a bill authorizing Governor Merriam to borrow from special funds sufficient money to carry on current relief programs pending the sale of \$24,000,000 in relief bonds April 11.

In the face of what appeared a real emergency, members of both houses forgot political differences long enough to pass the emergency measure and prevent drastic reductions in SERA work allowances which otherwise would have been necessary in view of a serious shortage of funds.

Reports of opposition to Governor Merriam's tax program began to take a more definite form as the legislature got under way.

Formation of a Democratic-progressive bloc under the sponsorship of assemblymen long connected with the epic movement, developed to the extent that Assemblyman William Moseley Jones, Los Angeles, claimed the group was approaching a workable majority in the lower house.

The tentative program of the bloc, in support of which bills have been promised in the near future, include higher income, inheritance, bank and corporation taxes than those proposed by Merriam as a means of producing necessary new income. The group favors exemption of foodstuffs from the sales tax and the establishment of a chain of state-owned liquor stores, the profits from which would be used instead of higher levies against the liquor itself.

After a series of meetings started early in January, a special assembly committee concluded its investigation of the building and loan situation throughout California. Reports of the committee's findings are expected to be used as the basis of new legislation governing these associations.

The state tax situation, already difficult, was made more complicated with introduction of a measure proposing a delay in the transfer of public utility property from the state to local tax rolls.

The movement was sponsored as a means of saving the state a loss of \$65,000,000 in biennial revenue. The delay, however, is opposed by Governor Merriam on the ground local tax rolls have been drawn up to include this operative property and any postponement would lead to serious confusion.

While no definite action was taken, preparations were made for committee consideration of the administration budget for the next two-year period.

There was every indication the budget itself would not be the object of any organized opposition, although a demand for strict economy by the assembly ways and means committee may lead to reductions in several departments.

Merriam's troubles were not confined to the assembly. County supervisors, in annual convention here, hurled charges against the administration's proposal to put all roads in the state highway system. Simply a plan to form a gigantic political machine, many supervisors said. They were supported in their attack by Controller Riley, formerly a supervisor.

When the governor addressed the supervisors and told them \$16,000,000 would be saved taxpayers biennially if the highway unification program is adopted they asked for proof. He said the figures were in his office.

On the last day of the convention supervisors asked that the governor appear before them again and explain his assertion. They had obtained technical information and were primed to dispute him. The governor, however, was out of town, so they asked for Earl Lee Kelly, director of public works who is pushing the unification plan.

Mr. Kelly will appear before you shortly, they were informed.

The meeting continued until noon. Restless supervisors waited through the noon hour. Still, no Kelly.

The convention adjourned early in the afternoon amid cries of "Where's Kelly?" "We want Kelly!"

Established 1869

## SPORTSMEN HOLD ELECTION OF OFFICERS

### Financial Report Given; to Again Operate Rearing Ponds This Year

At a meeting of the Truckee River Sportsmen's association last Monday evening the election of officers for the coming year was held with the following officers elected: Oscar Schumacher, president; A. C. Pfandler, vice president; E. C. Bavler, secretary, and Lawrence Owens, treasurer. Dave Cabona, Nick Swago, Frank Titus, Carl Bechdel of Tahoe City, Ernie Heitmann of Reno, Cecil Selbourn of Hobart Mills and J. W. Schwab of Floriston were elected directors.

The rearing ponds of the San Francisco Fly Casting club will again be operated by the association and a membership drive will start at once.

The financial report of the treasurer showed that \$585.50 was collected last year for dues and as donations and the sum of \$571.91 was disbursed for the activities of the association which had as its major project, the operating of the rearing ponds.

It was estimated that about 82,000 trout from three to five inches in length were released last fall from these rearing ponds. In addition to these trout the community was extremely fortunate last year in being able to take care of several cars of small fry in the Truckee River and its tributaries which could not be planted in other streams in the state due to the low water condition. The sportsmen's association have helped materially in improving fishing conditions in the region and are ready to continue their work again this year. The association is asking the support of the business interests of the region as well as all sportsmen who are interested in the conservation of fish and game.

### Winter Sports Season Reported Very Favorable

A report was given at the Chamber of Commerce meeting last Monday by C. Edmunds of the activities of the winter sports for the past season which has proved most successful. The financial report for the month of February was read showing a balance on hand with practically all bills paid. The week ends and holidays have brought many winter sports fans to the town with the American Legion snow frolic the outstanding event of the past season. Snow conditions have been unusually good and plenty of snow was available at all times for skiing and the various winter sports.

### Low Temperature Prevails Over Past Week End

Unusually low temperatures have been prevailing in this region since the snow storm of last week with temperatures reported as low as 12 below, freezing and packing the snow blanket which measures about 134 inches at Norden and 25 inches at Truckee. Tuesday and Wednesday the weather warmed up considerably and milder temperatures now prevail.

### Melodians to Furnish the Music for St. Patrick's Dance

Jimmie Dundee and his Melodians are all pepped up and raring to go to produce the syncopation for the St. Patrick's Day dance to be given by the American Legion Saturday night, March 16, in the Masonic hall.

Mike McCue has been appointed official judge of the prize cake walk for which a prize of a St. Patrick's Day cake will be awarded.

Every effort is being put forth to make this dance one of the outstanding events of the season and by the advance ticket sale a good crowd is assured.

## He's Now Out of the King Business

King Prajadhipok of Siam and his queen, who are no longer king and queen of their tiny kingdom. The king's abdication followed months of internal disputes over governmental matters. Their majesties are shown at their country home at Cranleigh, England.

### "And the Dr. Said" to Be Presented by Hobart P.T.A.

The Truckee Parent-Teacher Association have arranged with the Hobart Mills Parent-Teacher Association to present their recent successful comedy hit "And the Doctor Said," at the Methodist Church on next Thursday evening, March 21, at 7:30 p.m. The proceeds of the play will be divided between the two associations for their promotion work.

This play was presented at Hobart Mills last week and proved a big hit and the Truckee people are assured of a good evening of entertainment.

### Precipitation Records Show Above Normal

In a report from the office of H. I. Snider, district ranger, the record of precipitation for Truckee since the first of September are listed below:

September, 1934	1.04 inches
October, 1934	1.77 inches
November, 1934	3.75 inches
December, 1934	2.54 inches
January, 1935	3.49 inches
February, 1935	1.28 inches
The total precipitation to the end of February, 1935, since September 1, 1934, totals 18.87 with .45 inches above normal. Precipitation up to March 9 is 3 inches.	

### George Pace Purchases the Mighel Garage

George Pace, local business man, purchased on Monday the garage and business of Harry Mighels located on Bridge Street. Mr. Mighels purchased the garage and business from Frank Brummond several years ago. Mr. Pace who has been engaged in the plumbing business in town since leaving the employ of the Southern Pacific, plans to personally operate the garage and service station.

### Card Party at Catholic Parish House Thursday

A card party to which the public is invited will be held at the Catholic Parish house on Thursday evening starting at 8 o'clock. Mrs. Theresa Matthews will be the hostess of the evening and has arranged for attractive prizes and dainty refreshments will be served.

### Truckee-Tahoe Lumber Co. Increase Office Space

The Tahoe-Truckee Lumber company are making extensive alterations at their office located at the lumber yard on Church Street. The entire building in which their office has been located is being remodeled and converted into offices to facilitate the handling of their rapidly increasing building trade.

### Tahoe Ski Meet to Be Held Next Sunday

A request by the Lake Tahoe Ski club for a second sanctioned ski tournament has been granted by the California Ski Association with the date set for next Sunday. The directors of the club explained to the state officials that forecasts of rain and snow for March 2, the date of the first sanctioned meet, had resulted in a small attendance.

As some Class A jumpers of the various clubs have made other arrangements for Sunday, plans are being made for exhibition jumping by professionals. Lars Haugen, the local club's instructor, has Sig Uhland of Mt. Shasta as his guest and both men have assured Joe Henry, tournament director, that Alf and Sverre Engen of Salt Lake City will be on hand to help out in the program. They all are professionals and will compete within their own team as amateur sports rules prohibit direct competition with professionals.

These four competed here with a larger professional team in 1931, when Alf Engen established a record jump for the Tahoe hill of 210 feet. Sig Uhland last week bettered that mark by eight feet. Haugen tied Engen at 231 feet on another hill last year.

The B, C and D jumping events will again include state champions lined up against a score of aspirants for first place honors.

### Trial Set for Frechette Is for March 18

HOWELL, Mich., March 11.—Circuit Judge Joseph Collins set Monday, March 18, as the date of the trial for Clarence Frechette, apprehended at Truckee, for the slaying of his employer, Robert Brown, when Frechette appeared before him for arraignment.

Frechette stood mute when he appeared before the court and a plea of not guilty was entered for him.

### Nevada's 70-Car Train Limitation Bill Is Signed

Governor Richard Kirman Sr. signed the 70-car train limit bill recently approved by both houses of the Nevada legislature.

The new law, which prohibits operation of trains of more than 70 cars on any railroad line in Nevada, becomes effective in 60 days. The measure created one of the largest controversies in Nevada's history. It had the backing of railroad train crew employees but was opposed by railroad officials and railroad shop workers.

Southern Pacific company officials recently threatened to take locomotive repair work from shops at Sparks, Nev., to Ogden, Utah, and Sacramento, after the law becomes effective.

### Chamber of Commerce to Hold Election of Officers

At the meeting of the Chamber of Commerce to be held next Monday, March 18, at the Saddlerock Grill, the election of officers for the coming year will be held. A good attendance of members is desired.

### SERA Disbursements Over \$400 for Feb. 28 Week

SERA disbursements for the week ending February 28 for Truckee amounted to \$405.30, giving employment to 41 men. This is the largest number of men employed and the largest payroll since the start of the SERA work.

The extent to which the relief work has been carried on locally can be gauged by the above figures. The work these men have received through this relief agency has very materially assisted them and has been of benefit to the business interests of the community. It is hoped that the SERA finances will permit the carrying out of the present and proposed projects that these men may be kept at work until the first of June when the summer season is expected to take up the labor slack.

The work on the Truckee Sanitary district sewer is progressing satisfactorily although some delay was experienced due to the recent snow storm. The work of digging the basement of the ice palace is started on the winter sports project and it is hoped to get this well along by the end of the month.

### Supervisors to Give Hearing on T.B. Free Area

The board of supervisors met in special session Monday afternoon at the Nevada City courthouse to consider matters left over from the regular session.

They adopted a resolution opposing a bill now pending in the state legislature whereby the sheriff would be relieved of all criminal work, which would be performed by state police.

The board will also meet with a senate committee of the legislature on March 21 to consider several bills pending before that body.

On Tuesday, April 2, the board will hold a meeting with stockmen dairy men and those who may be interested in the establishment of a tubercular free area in this county, to be provided for in a proposed ordinance by the supervisors.

The supervisors also passed a resolution putting the board strongly of record as opposed to the unification of highways under state control as proposed by the administration of Governor Merriam.

District Attorney Vernon Stoll was instructed to prepare the resolution which will be sent to Senator J. L. Seawell and Assemblyman Jesse Mayo.

### Twenty-Nine Boys Register for Junior Drum Corp.

The request of the American Legion that all boys between the ages of 10 and 16 who desired to become members of the Junior Drum Corps should register with Acting Commander Frank Kinne has brought forth a ready response and 29 boys have already registered. The official application blanks will be given to the boys Friday for their parents or guardians signature.

The preliminary instructions in drill formation will start next week with Hugh McColl temporarily taking charge. Robert Leamon will be given drum major instruction and Geno Guidi will again be the sergeant drummer.

### Dr. W. H. Eckman Dies Suddenly

Dr. W. H. Eckman, husband of the former Pauline Schaefer of Truckee, was stricken while on his way to his dental office in San Francisco last Thursday and died later in Central Emergency hospital presumably from a heart attack. He was associated with his wife in his profession.

Funeral services were conducted in San Francisco on Saturday.

## INSPECTION REPORT RECEIVED ON HIGH SCHOOL BUILDING

### Alteration to Conform to Modern Construction Re- quirements Means Rebuild- ing; Fire Risk Excessive

S. E. Gordon, president of the board of trustees of the Meadow Lake Union High school, has received a report from George B. McDougall state architect relative to the inspection recently made of the high school building.

The report is far from favorable and the report stated in view of the age and condition of the building it is unlikely that any considerable expenditure for repairs would be justified. The modern construction requirements would amount to practically complete rebuilding. The fire risk is also reported as excessive. The report which has reference to the building and the conclusions of the inspector is given in part below:

**Roof**  
The rafters are supported by the exterior walls and by a miscellaneous collection of bents and trusses. The bents consist in general of inclined struts extending up from the tops of partitions to ribbons set against the underside of the rafters. The bents are not properly fastened to the rafters and many of the struts are too slender to be fully effective. There are trusses parallel to the side walls over the center of the middle rooms on both sides of the building. One end of one of these trusses is in turn supported by another truss over a rolling partition. None of these trusses are properly designed or constructed. Despite the many inadequacies, there is no serious distortion of the roof at present, due probably to the fact that the sheathing acts as continuous horizontal ties around the rather steep roof, thus preventing the rafters from kicking out at the wall.

**Floor**  
Although not well arranged with reference to the loads above the floor, the floor framing members are somewhat larger than usual and such over-stress as occurs under full vertical loads is considered not serious.

**Walls and Foundations**  
The brick walls are set with mortar which varies from fair to poor in quality and which has little adhesion to the bricks. Interior wall joints are not well filled with mortar and the header courses are spaced further apart than is now permitted. The rubble walls are old and are deteriorated to the extent that the original mortar in these walls has little structural value, at various times the walls have been repaired and patched with varying degrees of success.

The cracks in the east, south and west walls indicate some movement of the south wall. In view of the relatively light loads, the walls and foundations are considered satisfactory for normal vertical loads.

**Resistance to Horizontal Forces**  
The building offers little resistance to horizontal forces such as may be caused by an earthquake. Neither the roof nor the floor have adequate horizontal stiffness, or the anchors necessary for proper resistance. The poor quality and condition of the masonry walls preclude the possibility of their successful resistance. The brick chimney is particularly vulnerable to earthquake damage; the condition is aggravated by the long unbraced length of chimney in the attic space.

**Fire and Panic Hazards**  
Modern standards require alternate paths of egress from any point in a school building, and that heater rooms be well separated from the other parts of the building. In this building there is only one means of egress from the main story and from the basement toilet rooms and the heater room is separated only by an incomplete installation of

### COMMENTS FROM CALIFORNIA NEWSPAPERS

By United Press

Regardless of its merits Governor Merriam's proposal to include all county roads in the state highway system will meet vigorous opposition when it comes up for legislative action, in the opinion of California editors.

County officials, whose patronage would be affected, are not expected by the editors to remain silent while the measure is being discussed.

No one, said the Bakersfield Californian, "desires to lessen county authority in connection with the conduct of local affairs, and the opponents of the governor's proposal may find some strength in that argument. But if the proposed state program will effect such a material saving, estimated to average \$13,000,000, it must necessarily appeal to the public and particularly to that portion of it which meets the expenses of county government through direct taxation."

Counties which have a large automobile registration, notes the Orange Daily News, "and hence get a considerable allotment of state gasoline tax funds, will not readily surrender such funds unless assured that the state will continue to expend them within the counties. All county roads would be swept into the state system, providing relief for local taxpayers from costs of maintenance and operation. It is anticipated, however, that the move will prove the basis of a strenuous legislative battle, with county supervisors opposing."

Concerning the estimated saving, the Riverside Daily Press points out "it has already been asked if the state has \$16,000,000 to spend on county roads . . . what has the highway department been doing with this amount for several years. The department has been spending such a sum on the approximately 14,000 miles of present state roads. Now it is proposed to take over 61,000 miles more of roads and properly maintain the entire system with the same amount used on the greatly shorter mileage. It hardly seems possible."

No more money, remarks the Oroville Mercury-Register, "would be available for roads at the start than is now available—the sum would be smaller because no county could assess a road tax. And the sum would be rapidly depleted by the deductions allowed in the administration's bill. Men who have studied the matter declare that present road funds would be cut 50 per cent. . . . Those who believe in good roads as developers of communities and their trade must be on their guard."

As viewed by the Visalia Times-Delta, "counties without much road debt and little borrowing of state relief funds, like Tulare county, would be severely penalized, but some counties like Alameda, which has borrowed 60 per cent of the state's relief funds, and has heavy highway bonds for roads and tunnels, would get all the best of it. . . . Argument after argument could be piled up, but this ought to be sufficient to damn the transfer scheme as far as Tulare county is concerned."

County supervisors, comments the Chico Record, "are directly responsible to the people of their county and if they do not do the thing approved by the taxpayers they can be called to task promptly. The highway commission is non-salaried, appointed by the governor and the protests of local taxpayers would be futile. Answering the claim that supervisors are opposed to the proposal because it would remove from them some of their political patronage, the supervisors ask by what sort of political magic would the state department of public works be immune to the odium of patronage."

### TRIUMPHANT DIESELS

Diesel engines, in the good old biblical phrase, "go from strength to strength." The Winton company, chief American producer of this type, is now building a 3600 horsepower motor for the Burlington railroad, to carry a 22-car train between Chicago and Denver. This is more than five times the power used in the Burlington's celebrated Zephyr train, which has broken so many records.

The Zephyr, by the way, is reported as earning \$440 a day, more than 10 times as much as the steam train it displaced. This comes partly from the larger patronage attracted and partly from operating economy.

It is plain in what direction railroads are headed. And not merely in America. France's greatest railroad is preparing to substitute Diesels for steam locomotives. We shall probably be doing the same thing as rapidly as the new installations can be produced and financed.

## Spring Deliveries

It may be true, as some railroad men insist, that steam locomotives can make as much speed as Diesels, but apparently they can't do it so economically, with so little weight per passenger and so little wear on rails and road-bed.

### "LAND OF MANY RIVERS"

Saturday is market day in Jamaica and then all towns and all roads present quite a lively aspect. Every woman is up early preparing the produce to be taken to the nearest town and dressing herself in her best. When finally she is ready for the road she makes a picture of shining cleanliness, with her beaming black face surmounted by a colored kerchief, her clean print frock no longer patched and slovenly and her bare feet. She carries on her head a huge basket filled with an incredibly heavy load of bread-fruit or other produce. The men-folk, too, balance their goods upon their head and are dressed in their best and cleanest shirt and trousers, wearing the latest cap and carrying their boots slung round their necks. Boots are a sign of respectability, but even the most respectable country negro cannot be expected to constrict his feet into such things until the last moment. He usually, therefore, stops just outside the town to don his footgear and keeps them on for just as long as he can bear it—possibly an hour. On the homeward journey he will probably carry his boots on his head, having disposed of his load of produce or baskets in the market.

As to the scenery, Jamaica has probably some of the finest country in the world. The original Indian

name for the island was Xaymaca, "The Land of Many Rivers," and it is, indeed, a true description, particularly after the rains during May and October. At other times of the year many of the wide riverbeds are dry or only contain a trickle of water, barely sufficient in which to do the family laundering, for every river bank has its groups of chattering negroes rinsing and spreading out clothing to dry in the brilliant sunshine. Many of these rivers tumble in cascades from the Blue mountains to the sea and one of the most picturesque falls is Roaring River falls on the northern side of the island, near St. Ann's. The water here drops in a series of showers, glinting in the sun, amidst palm trees, ferns and tropical plants of all kinds.

The beautiful trees by the wayside—mahogany, mahoe, silk-cotton and many others—frequently make little worlds of their own; their enormous branches spread over a huge area and from them depend long streamers of Spanish moss, while in the forks of the trees grow wild pines, and gay orchids add spots of color. Bright green lizards, glorious butterflies and brilliant humming birds dart in and out among the branches.—Maj. W. T. Blake, in "Ports of Call" (London: Grayson.)

### Politically Speaking

By GEORGE E. HELMER  
(United Press Staff Correspondent)

SACRAMENTO, March 14 (UP)—Epic demands of the 1934 gubernatorial campaign have been reiterated in the 1935 legislature, but the question of Epic, or democratic, or anti-administration strength has yet to be determined by a vote on some controversial measure.

First formal cry for support of one of the old Epic teachings was made in the assembly by William Moseley Jones, democratic leader, who sought to have \$5,000,000 in relief funds set aside for self-help co-operatives.

Discussion indicated he had considerable backing in his plea for state aid to the co-operative unemployed groups, but the majority agreed with Controller Riley that that was no time to push the issue.

An argument which lasted an hour and a half was based on the proposal that \$10,000,000 be borrowed from special funds to meet relief demands until the state's \$24,000,000 bond issue is sold next month. The "loan" then will be repaid.

Jones wanted half the money earmarked for self-help groups. Riley speaking before the assembly meeting as a committee of the whole, said that would not be possible because the funds must be disbursed as though they were part of the bond issue, the spending of which was directed in the amendment approved by the electorate last November.

Early developments made it obvious that the lower house will be the scene of endless battles during this session which will extend well toward June.

Administration pleas for "intelligent co-operation" in solving the state's problems seemed to have made little impression on democrats and anti-Merriam forces who were preparing to shoot holes in the administration tax program.

Charles W. Lyon, the governor's floor leader in the assembly, told his colleagues that Merriam would consider any substitute plans that had merit. But he urged the members to refrain from fault finding just to be criticizing.

A bloc of democrats remained determined to fight for a Bourbon program differing widely from the governor's 14-point tax plan. They opposed so-called nuisance taxes on admissions and tobacco; increased sales and gasoline taxes; consumers' levies on utility services.

They had no assurance that the governor would consider their plans sensible. They were determined not to let the administration program ride through without a battle.

Even some of the ordinarily mild-mannered republicans greeted reporters with the observation: "You will have plenty to write about when we get underway." And administration leaders secretly admitted they expected a wide variety of sharpshootings.

Jones and his democratic followers, incidentally, insist they are no longer Epics, but are democrats fighting for the Bourbon platform on which the party stood during the

fall campaign. They have gained some support among anti-Merriam republicans, but the actual outcome of important issues may not be determined until the measures themselves are brought to a vote.

Installation of a "flash" system of voting in the assembly won the approval of legislators and reporters because it speeded the routine of the roll call immeasurably. But it caused lobbyists to grumble loudly, as it robbed them of their previous ability to scurry around the floor while a vote was in progress. It also made it harder for them to keep a record of roll calls.

The system consists of locked switches on each member's desk, two large boards in the front which show each member's vote, a record box which punches a permanent copy of each roll call and a page board through which assemblymen may call a page by pressing a third button in the conical switch device.

By means of the electric vote a roll may be called in 10 or 15 seconds. The old method required five to eight minutes.

Assemblymen voted to install the system on a temporary basis for \$10,000. If they decide to keep it, they may add \$19,000 to the payment and the elaborate layout will be made permanent.

First attempt to bring peace to the assembly was made by Charles W. Lyon, administration floor leader, who concluded the first day's meeting with an address pleading for "intelligent co-operation" rather than personal bickering during the forthcoming attempts to heal the state's financial and unemployment ills.

### Anti-Crime Conference in Sacramento March 18-19

SACRAMENTO, March 14 (UP)—Re-organization and strengthening of law enforcement agencies in the far west will be the outstanding topic for discussion during an anti-crime conference to be held in Sacramento March 18 and 19.

Governor Merriam calling the conference hoped to have the governors or their representatives from all western states, together with outstanding peace officers, participate in the discussions.

Probably no action will be taken and there may not be any resolutions passed. The main objects will be to develop state compacts and make the people interested in the president's anti-crime program.

Merriam is interested particularly in making arrangements with governors of adjoining states to permit peace officers to cross state borders in pursuit of criminals, without having to wait for extradition orders.

Other topics to be discussed include state constabularies, co-ordination of state, county and local law enforcement agencies, extension of teletypewriter systems throughout the state to speed detection work, establishment of police radio chains, universal finger-printing, prison reform, crime prevention, detection and apprehension of criminals, communism and general organization and personnel.

Raising the standards for peace officers and establishment of training schools will be considered as

## TAHOE REGION NEWS

By Swancee

## Attention Customers:

Should you desire it, your Sierra Sun will be forwarded to any address if you will call Tahoe City 66J or the Sun office, Truckee 161.

Mrs. Joe Duffee acting president of the P.T.A. announced Monday that this organization will sponsor an old-fashioned hard-time dance and supper Saturday evening, March 16, at the Women's clubhouse. The Jiggs' Dinner to be prepared by the hostesses Mesdames Henrikson, Oliver and Tyler, made in the famous kitchen of Mrs. Tyler, will be served at 6 p. m. The affair one of the jolliest ever attempted by the local group, will also contain many entertaining surprises during the evening among them comedy skits, a shot gun wedding, solos by Mrs. Lars Haugen, group games, and old fashioned square dances with Arthur Delbo as caller. Piano and drum will furnish the music for the dance. Clarence Vernon and Mrs. Charles Swanson officiating. So high did the enthusiasm run at Monday's meeting that the men folk present in a reckless mood, besides offering any assistance beforehand even agreed to washing up the dishes and cleaning up the premises after the ball—which is some enthusiasm in any man's language! A large crowd is anticipated as Tahoe will hold its invitational ski meet the following day and the numerous contestants will be in town and are to be invited. All money realized from the affair will be placed in treasury to be used in furthering community projects, the contemplated new log community hall the prime objective at the present time. The clubhouse for the occasion will be transformed into a rural setting with rustic benches replacing chairs and straw sprinkled about, the emerald green of St. Patrick's day predominating in the color scheme. Bill Oliver has been appointed rural constable and will collect fines of 10c from all dancers attending not attired in hard times regalia. A prize will be awarded the man and lady wearing the most appropriate outfit in the estimation of the judges.

The drawing will also be held for the hand-blocked quilt made by Mrs. Joe Duffee and Mrs. Henrikson for the purpose of raising money for the school orchestra fund. A sum of over \$60 has already been taken in on it, marking it as one of the most successful ventures of its kind ever attempted at Tahoe.

Don't forget the date, Saturday, March 16—the place, the Women's clubhouse—the time, 6 p. m. and the price 50c. Come and bring your friends!

The Lake Tahoe Ski club will hold a sanctioned invitational meet next Sunday, March 17, at ski hill canyon starting at 1 p. m. The meet will embrace A, B, C and D jumping, slalom and downhill racing, but no cross country races. Clubs which have been invited to enter include Auburn, Truckee, Reno, Mt. Lassen. Prizes will be awarded winners.

Lars Haugen and Sig Ulland of Mt. Shasta will make exhibition jumps from the A scaffold during the afternoon, the latter holding the record for the Olympic hill having made a 218 foot jump here in 1932.

A signal honor was paid Junior Henry this week with the announcement that because of his excellent record for the past four years, he was one of eight men selected as eligible in slalom and downhill racing to enter the Olympic tryouts to be held at Mt. Rainier, Wash., April 13 and 14. The other seven include Halvor Mikkelsen, Sigurd Vettestad, Andrew Blodger and Elmer Vanderbilt, William Stark, J. Patterson and Roy Mikkelsen.

Mrs. Henry Soll is one of those unfortunates who are perfectly willing to celebrate a birthday, if only the day is provided! Mrs. Soll, who is really and authentically only 10 years old (as her birthday occurs but once in every four years on Feb. 29) was nevertheless, a guest of honor at a birthday dinner party at the J. E. Pomin home on the 28th, the nearest she could come to the right day. Others enjoying the occasion besides the hosts were the Misses Agnes, Alice and Mary Jane Soll and Henry Soll.

Mr. and Mrs. M. Hamilton and son are visiting in the bay region.

Mrs. Otto Hursey and son departed Monday for Fallon where they will visit indefinitely at the ranch home of her mother.

Mrs. Henry Worden and daughter

will leave this week for two weeks with relatives in Oakland.

Grammar school will reopen at Tahoe on March 25, bringing to a close a vacation of over three months.

Harry Johansson played good Samaritan to his neighbors Thursday while roads were closed, distributing mail by means of his dog team. Harry received sterling compliments during the filming of "The Call of the Wild," the director informing him that they had formerly been forced to paint the dog's fur to make it appear colorfully marked. Harry's dogs, used in the shots, are beautiful, well kept creatures and rendered extremely satisfactory service due to their expert handling and training. The film company intimated further use would be made of his team before the winter is over.

Marion Kendrick of San Francisco was a visitor at the home of his parents Sunday last.

Mrs. Bob Harkness, greatly improved in health, is back again following a rest in an Auburn hospital.

Mr. and Mrs. Sisk and daughter are visiting in Oakland.

The Frank Pomin are expected back this week following several months of vacation and traveling.

Work at the Henry Kaiser estate was started this week, interior finish on several cottages now in progress.

The sun shone through again on Monday and Tuesday following a three day heavy, intermittent snow storm which piled up a good two feet more in some districts and dropped the barometer to 10 below zero. Tahoeites are extremely grateful to the highway department for the prompt and efficient service rendered in keeping the highways open to travel. Only for very short intervals have the natives been denied the use of their cars because of the deep snow and this was while plows were busy keeping the main arteries open. Highest commendation has been voiced on all sides, caretakers especially grateful for this prompt and efficient plow service.

## NEED CLEAN OLD NEWSPAPERS?

Going to clean house soon? If so remember the Sierra Sun has clean, back-numbers of newspapers for sale at 5c a bundle which will come in handy for covering shelves and what other needs might be necessary.

## HOBART MILLS

The play and musical program given by the P.T.A. Thursday evening went off in fine shape and was thoroughly enjoyed by all who attended. There was a short musical program before the play consisting of a solo by Edwin Murray and a violin solo by Frank Piehl, accompanied by Chester Elliott on the piano, quartet consisting of Ralph Cardinal, Karl Weeks, Chester Elliott and Frank Piehl. The play entitled "And the Doctor Said," followed with Mrs. Don Fletcher playing the maid's part, Mrs. Lester Edwards as an elderly spinster, Mrs. Adrian Murray as Dr. Killequick, Mrs. D. Dundas as Dr. Violet Rayburn Smith, Miss Ruth McLeod as Dr. Crack'em Boneapart Smith, Mrs. Bert Canonic as Dr. Cutupski Smith, Miss Lucy Otis as Dr. Pansy Smith and Mrs. Earl Ross as Dr. Zenobia Spufenstein Smith. The stage was nicely arranged and the plot kept the audience in an uproar. Many local people came in on the jokes and the curtain fell all too soon.

Following the play were two living pictures displayed while vocal selections were rendered. Mrs. James Percy portrayed Mother McCrea while George Hampson sang and Mrs. Allen Hill accompanied by her grandson Bobbie Campbell, and Norman Edwards posed while the Missouri Waltz was rendered by the quartet. The children were especially good in this and created no end of applause.

Mrs. E. K. Wilson then favored the audience with a few remarks thanking all who assisted her and the cast of the play and briefly reviewed the year's work, stating that the purchase of the piano for the school as well as supplying half of the February salary of the primary teacher and the proceeds from this play would complete paying the March salary. She stated that while it would seem that the piano was a very lasting and worthy contribution, that she felt the assistance given the school children by helping provide a primary teacher would be much more lasting than the piano as the children who received the assistance would probably outlive the piano and that would prove that

after all that education of our children is the greatest investment of all.

A bath mat was then displayed and some additional tickets sold before the drawing took place. Harry Edwards held the lucky number that won the mat and it looks as if Harry has made a start toward furnishing a home for himself.

The closing number was the band consisting of members of the cast accompanied by Mr. Elliott at the piano and Mrs. Lester Edwards as band master. Liberal applause greeted the last musical number and some bunched vegetables were presented by friends to express their appreciation.

Mrs. Harry Woods entertained two tables of bridge for the benefit of the P.T.A. Wednesday with the following ladies being the prize winners: Mrs. B. L. Phipps, high, and Mrs. H. G. Seibold, low.

Mr. and Mrs. John Person entertained the group of eight couples who are playing a series of bridge games when the men play against the ladies Saturday evening. Previous to this time the honors were even and each side had a game to their credit. When scores were counted the men were ahead and received the cheers of the ladies. With the law of averages so evenly divided the ladies expect to be victorious at the next tryout. It was agreed to play five times and the contest is getting most interesting. The men showed the results of the practice they are getting and the ladies are going to have to play hard from now on. The following were prize winners: Mr. and Mrs. Martin high, Mrs. V. C. Mack and E. K. Wilson low. The following were present: Messrs. and Mesdames E. C. Murray, E. K. Wilson, A. D. Murray, Martin Nelson, Frank Wilson, H. G. Seibold, V. C. Mack and John Person.

G. D. Oliver who spent several days in town last week returned to Berkeley Saturday afternoon.

Oscar Olson visited his family in Roseville over the week end.

Mr. and Mrs. Thos. Craig and

THE 1935 Ford V-8 brings you the most important Ford development since the introduction of the Ford V-8 engine—the new Full-floating Springbase with Comfort Zone Seating.

Wherever you sit in this new Ford V-8, you ride centerpoised—between the springs. Springs are longer, more flexible, and the springbase increased to 123 inches. The result is "front seat riding comfort" even for back seat passengers.

New riding ease in the 1935 Ford V-8 is matched by new driving ease. Control, steering, parking are easier. Starting and shifting have been made almost effortless. Braking requires surprisingly little foot pressure—yet is surer, smoother.

Here is a car that is styled to the min-

ute—built for the years. Welded all-steel body, engine and chassis improvements make it more durable than ever. Safety glass throughout at no extra cost.

Look to this new Ford V-8 for everything you could want in a modern car. See it at your nearest Ford dealer's now.

CHAS. CARRAU, Manager

NORDEN NEWS

The movie people who have been making Truckee their headquarters for the past several days, motored to Kingsley west of Norden, to shoot the final scenes in their latest picture and report ideal snow conditions.

The clearing weather that has settled over the Sierras the past several days was responsible for the large exodus of tourists to seek the de pest snow fields possible with the majority arriving over Saturday and Sunday with 54 reported at the Sierra club and 30 at the Tourist club.

Snow conditions are now best during the month of March than for the past 10 years and lovers of this sport can find their particular type of snow to meet their requirements upon the untrampled hills that abound Norden.

In last week's issue of the Sierra Sun residents here received with pleasure the news that Miss Mary Bolander and William Walkie Jr. announced their wedding for next June, the ideal wedding month. Both parties are well known here and congratulations are extended the happy couple.

Manuel Berry, who has been on the sick list at his home in Sacramento, returned to resume his duties here.

John (Sheriff) Creasy of B&B 108 made a hurried trip to Sacramento last Saturday on business.

Kenneth Lyons and mother, with a number of friends motored to Reno Sunday evening to attend a theater party and reported fine entertainment.

The Backarich home was filled with friends over the past week.

Teddy Eversult, the five-week-old son of Mr. and Mrs. T. E. Eversult, continues to gain in weight and is doing excellent in every way and has not to date placed his dad on the spot for an all-night walking marathon.

With spring in the air the Boomer family will soon blossom forth with the news that has been anxiously awaited that household.

Matt Dubelbeiss of Crystal Lake was in Norden last Sunday looking over his cabin which was all but completely submerged with the winter pack of snow.

Mrs. W. G. Flickinger and children spent the past week end here, having come up from Sacramento where the children are students.

Word of who the successful applicant for first trick Norden is not available. This position has not been open to bid for the last 18 years and is causing telegraphers to dig deep in their seniority rights for this coveted job which was held by William Sellick who is now residing in Vallejo.

Bobby and Alice Boomer can be seen daily using their skills to good advantage about their home.

Jim Leung of B&B 108 was a recent visitor in San Francisco.

George Kading plans to visit in Sacramento next week.

Tom Gorman postponed a date to Roseville until further notice.

HOBART MILLS NEWS

(Continued from page 3)

daughter spent the week end in Auburn visiting relatives.

Forest Richardson visited in Sacramento the last of the week.

Oscar Nelson and son went to Auburn Friday and visited Mrs. Nelson and sons over the week end.

T. D. Thibault visited in Nevada City during the week end.

Mrs. Irma Atkins and Miss Ruth Bock visited in Reno Saturday.

Cards received from Mr. and Mrs. George Lossleyong stated that they arrived in Marshfield, Wis., Wednesday and experienced considerable storm en route. They were delayed at Kearney, Neb., and state the oiled roads of the middlewest are bad and even worse than the Truckee-Hobart road since the heavy storms.

T. K. Oliver arrived home Monday from a visit with his family in Berkeley and was accompanied by his brother Jack, of Modesto who visited here and in Reno for a few days.

Frank Wilson drove Jack Oliver to Reno Monday where he visited Mr. and Mrs. Charles Oliver.

Mrs. Marian McSparron of Los Angeles arrived here Sunday for a visit with her sister, Mrs. James Percy.

Jim Fippin visited at his parents home at Rough and Ready Sunday.

Albert Fippin who was operated upon for appendicitis at the Jones Memorial hospital in Grass Valley is reported as making good recovery and expects to be removed to his home the latter part of the week.

T. K. Oliver will leave for Berkeley the latter part of the week and will continue on to Los Angeles where he will spend the week end.

Mr. and Mrs. G. D. Oliver expect to return home the latter part of the week to remain for the season.

William Jrice and Mr. Dugan of the forest service office in San Francisco were business visitors in Hobart Tuesday. The gentlemen are gathering statistics for a complete history of sawmills operating in this vicinity at present as well as in the past.

L. S. Batterson returned to Sacramento and resumed his old position after spending the past year here. Mrs. Batterson and twin daughters will join Mr. Batterson in the next few days.

Mr. and Mrs. Harry Woods and Mr. and Mrs. Erle Martin went to Reno where the men attended the Elks lodge session and the ladies went to the show.

Mrs. Harry French returned to her home after several weeks spent visiting her mother in Modesto.

Mrs. Linnie Jouett was able to be at the postoffice Tuesday after a week's absence due to suffering with an injured knee caused by a fall.

Mr. and Mrs. Joe Jouett leave the latter part of the week for a vacation on the coast.

Charles Keiser expects to go to San Francisco Friday where he will spend a few days.

Mr. and Mrs. Earl Murray and Doctor and Mrs. Schwing were Reno visitors Saturday.

Ray McDonald spent the week end in Sacramento visiting his family. Cecil Selburn visited at Brockway Sunday.

Jack Anderson of Tahoe City was a business visitor here Monday.

Mr. and Mrs. De Dundas were

Reno visitors Tuesday.

Ralph Cardinal and Karl Weeks skied to Camp 21 where they spent Saturday and Sunday with the caretakers.

Mr. and Mrs. P. W. Lazier and Mr. and Mrs. Earl Martin went to Reno Sunday to attend the show.

Mr. and Mrs. V. C. Mack entertained two tables of bridge Monday evening, with Mr. and Mrs. E. K. Wilson, Mr. and Mrs. De Dundas and Mr. and Mrs. Martin Nelson at tending. High scores were won by Mr. Mack and Mrs. Nelson.

The P.T.A. will meet Thursday evening when the bills in connection with the recent play will be paid and will know just how much was cleared last week.

Father Hubbard's Alaskan Dogs Parents of Sextuplets

CHICO, March 7. (UP)—Father Bernard Hubbard's famous Alaskan lead dog, Margie, probably doesn't know about the Dionne family, but—

When the noted glacier explorer left for eastern states on a lecture tour he left three of his huskies with his brother, Capt. J. D. Hubbard, here. Included were Margie and Mageik, celebrated lead dogs. Margie and Mageik are now the proud parents of sextuplets, according to announcement of Captain Hubbard.

Only Healthy Bees Will Be Shipped From State

SACRAMENTO, March 14 (UP)—In the future California will ship only healthy, aristocratic bees.

Inauguration of an inspection service for the \$200,000 package bee industry was announced by the department of agriculture as a means of improving bee standards.

The new service will result in the issuance of certificates to signify that the bees in certified packages are healthy and suitable for building up colonies for honey production in other states.

Recommend Patrolmen Use Ordinary Cars

SACRAMENTO, March 14 (UP)—Motorists are becoming cross-eyed from watching the rearview mirror and the highway at the same time, Chief Cato of the California highway patrol maintained when he sought support of legislative bills to permit patrolmen to operate in cars other than those painted white.

Approval of the bills would permit patrolmen to use ordinary passenger cars. Certain squads would be used as special raiders or trouble shooters wherever traffic viola-

tions were reported numerous. Since the cars would bear no distinguishing marks, their approach would not be so noticeable.

Cato said the white equipment would not be abandoned.

The psychological effect of using ordinary cars will be good. Drivers will never be sure that a car approaching them is not a patrol car. This should cause them to drive carefully and at a prudent rate of speed.

New Organization in Liquor Industries Formed

The maintenance of a new standard of ethics in the entire liquor industry was foreshadowed by the formation of a new organization called the California Liquor Industries Association. Membership already includes more than 350 California companies operating under the national liquor codes—including as well almost every eastern firm that is distributing in California—representing every branch of the industry—distilling, rectifying, importing, wholesaling, retailing and allied lines.

The organization will take an active part in helping to create for the liquor industry the same degree of prestige that is enjoyed by other industries. It will do its utmost from within to aid in the enforcement of all state and federal laws so as to curb the bootlegger who is still a major foe of the industry as well as of the United States government. The association will create plans for sound trade practices and intends to constitute itself as a reliable source of exact information for every branch of the industry.

The organization will maintain division offices in Los Angeles and San Francisco, with branch groups in each of the 58 California counties.

Ford's March Production Has Been Set at 160,000

Ford's March production schedule has been set at 160,000 units, an increase of 24,337 over the 135,663 V-8s produced in February, according to word received from Detroit by John Thornton, local Ford dealer.

With a total production of 400,000 units for the first three months of the year practically assured, and with the demand for the V-8 steadily increasing, we are well along the road to a million and more cars in 1935—the goal set for the Ford organization by Henry Ford early last November.

The Ford company branch at Richmond, where cars and trucks are produced to supply the dealer organization of northern California, western Nevada and southern Oregon, is now running at top speed turning out between 300 and 400

V-8 cars and trucks daily and employing 2400 workers.

An indication of how conditions have improved since last year, is the fact that Ford sales in January were more than twice as high as they were in January of 1934 and February figures showed a 25 per

cent increase over January. The imposing sales figures for V-8 cars and trucks throughout the nation during the first two months of the year must be accepted as evidence that business has improved and I predict that it will continue to improve, Thornton concluded.

### Pacific Coast Banker Confers With Federal Housing Administrator

WASHINGTON, D. C., March 7.—Bankers from the states and the District of Columbia were in conference with Federal Housing Administrator James A. Moffett. The primary consideration at this conference was the enlargement of activities and operations of the Modernization program, in order that commercial buildings, industrial plants, hotels, hospitals, apartment houses and other large structures may obtain the benefits of insured loans for improvement of these properties. At the present time these loans are limited to \$2000.

George J. Panario, vice president in charge of real estate loans of the Bank of America, National Trust and Savings association of San Francisco, and others came here in response to an invitation from Administrator Moffett.

Mr. Panario said "our bank with its 500 or more branches on the Pacific coast, realized early what the National Housing act meant to this nation's recovery and prosperity through the rejuvenation of the durable goods industries. We got wholeheartedly behind the purposes and plans of the housing administration with all our great resources.

"We devoted our entire advertising to the subject of homes. It was not only patriotism that inspired us but a selfish interest, as you will see from the results obtained. We have, through our banks in California alone, made more than 6800 modernization loans for a total of \$2,720,000. In addition to the granting of loans to individuals, we have been a strong advocate of modernization and reconditioning of properties over which we have no control. Our experience has shown us that small expenditures for the modernization of homes maintain and enhance the value of these homes and has made it possible to find a market for them where previously there had been no market. The same situation holds true of our own properties and we spent \$790,000 last year modernizing and reconditioning properties which we had taken over. After such modernization work was done the sales on these properties increased over 100 per cent. In our opinion the modernization, maintenance and repair program of the housing administration is as sound a business proposition as ever came out of Washington."

Commenting on Mr. Panario's statement, Administrator Moffett said that reports which have come to him recently show that many other institutions are following the same fundamentally sound program of modernization of properties and plants.

### Cancer Is Curable, Says Department of Health

SACRAMENTO, March 14 (UP)—Cancer is a curable disease if it is treated early.

This fact was stressed in a bulletin issued by the state department of public health in calling attention to the campaign sponsored by the American college of surgeons to organize cancer clinics in the centers of population in California.

Cancer is a disease personal to the individual who has it and can not be transmitted in any known way to another person, the bulletin stated.

There has been too much pessimism and fear about cancer because until recent years an early diagnosis of cancer rarely was made and the disease usually was so far advanced before the patient sought treatment that nearly all patients died of the disease.

In calling attention to the fact cancer can be cured, the bulletin listed the following important factors in treatment:

When a new symptom, pain, discharge, bleeding, lump, ulcer, indigestion, loss of weight, presents itself and persists, you should seek at once the advice of your physician as the symptom may be a danger signal indicating the presence of a condition which might lead to cancer, if neglected.

Cures are more easily obtained when the disease is recognized in its early stages, although some cases of advanced and neglected cancer if properly treated may be cured.

There are no secret cancer cures, no serum or injections of value. The only reliable methods of cure depend upon operation and the use of X-ray and radium.

Any case of cancer free from evidence of the disease and without symptoms for five years or more after treatment, is regarded as a cure. A total of 16,000 such cases were reported throughout the country last year.

#### Christian Science

"Substance" will be the subject of the Lesson-Sermon Sunday, March 17, in all churches of Christ, Scientist, branches of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The Golden Text will be: "What soever God doeth, it shall be for ever" (Ecclesiastes 3:14). Other Bible citations will include: "Now faith is the substance of things hoped for, the evidence of things not seen. . . . Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear" (Hebrews 11:1, 3).

The Lesson-Sermon will also include the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Substance is that which is eternal and incapable of discord and decay. Truth, Life, and Love are substance, as the Scriptures use this word in Hebrews: 'The substance of things hoped for, the evidence of things not seen.' . . . As God is substance and man is the divine image and likeness, man should wish for, and in reality has, only the substance of good, the substance of Spirit, not matter" pp. 468, 301).

### Utility Ownerships Being Considered by Legislature

SACRAMENTO, March 14 (UP)—Private and public ownership of utility services will be investigated thoroughly by the California legislature along lines designed to determine what changes are needed for the good of the public.

Recommended re-organization of the state railroad commission and study of a proposal to place the state in control of water and power facilities were expected to develop clashes between advocates of private and public ownership.

The utility problem, growing in interest during the past several years, reached a peak during the January legislative session when scores of bills were introduced affecting common carriers, gas, light and power companies, rates, salaries and property values.

Among these measures were recommendations that a special legislative committee investigate the possibilities of the state taking over all water and power facilities and operating them as publicly owned utilities. Advocates of such a plan believed the profits would be far in excess of the income derived from taxing privately owned utilities.

Governor Merriam recommended a far-reaching consumers' tax on gas, electricity, telephone, telegraph and other utility services. This would reach practically every family in the state.

Limitation of utility officers' salaries was the object of a bill by Senator John B. McCall. Under it salaries chargeable to operating expenses would be limited to \$15,000. Anything over that would be expenses and taken out of the consumers' rates.

Several bills proposed re-organization of the state railroad commission into an elective public utilities commission. The present commission is appointed by the governor.

Another bill specifies that the commission and courts shall be empowered to compute a fair utility return at a rate not exceeding six per cent annually.

Miscellaneous bills included one providing that utilities give blind persons free transportation on street cars and permit half fares on other common carriers. Taxicabs operating over state highways would be declared common carriers.

### Building Activity in California Shows Increase

Building activity in California showed the most spectacular increase of any of the accepted indexes of business during the month of January, according to the Bank of America Business Review. The state as a whole showed a building gain of 74.1 per cent over the like amount last year.

Stimulated by the federal housing campaign 40 cities out of 52 reporting throughout the western states showed building gains in January of this year over the first month of 1934, while seven out of eight western states reporting showed net gains in building permits.

In California favorable weather conditions have permitted an outstanding record in home modernization work throughout the winter months, while eastern states have been hampered by climatic difficulties.

California's retail sales last month increased 10.2 per cent over January, 1934. Continuing the pickup in sales volume that has been evident throughout 1934 in the agricultural areas of California, 10 stores in central California towns reported a net increase of 21.4 per cent in retail sales last month. Increased farm income accounts for the upturn, the Bank of America Business Review reports.

California farm prices in January, as indicated by 24 basic commodities, were at 86 per cent of the 1910-1915 average. Bank debits last month were 6.8 per cent ahead of the previous January in this state.

Business failures during 1934 were 18 per cent less than in 1933 and liabilities of defaulting firms were 20.9 per cent lower than in the preceding year in California.

### New Ways of Handling Liquor Problem Considered

SACRAMENTO, March 14 (UP)—Enforcement of liquor laws exclusively by state agencies may be the answer to liquor control problems, in the opinion of many state officials.

As the legislature prepared to take up consideration of scores of liquor bills, a special senate investigating committee returned from the last of a series of meetings.

Difficulties developing as a result of a division of power between the state board of equalization and local peace officers apparently are growing worse, according to findings of the committee.

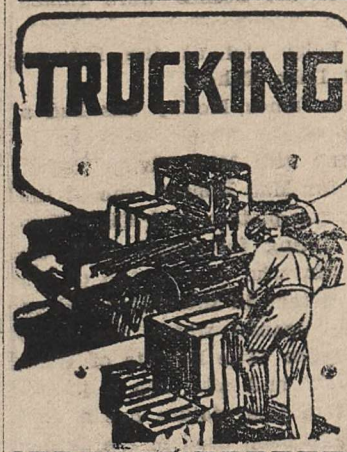

Senator Thomas S. Scallan, committee member, said that unregulated distribution in the beer industry had led to considerable racketeering, particularly where police departments seem to be in on the play.

The committee is expected to recommend that beer distributors be placed under the same control as brewers and that the so-called "barrel houses" be closed.

Need of regulation in the wine industry, particularly from the standpoint of proper labeling to show the age and place of origin of wines, was revealed by the hearings and recommendations to correct the situation as a means of protecting the wine industry from itself will be made to the legislature, it was indicated.

Several bills which would grant appropriations to the department of public health for the purpose of enforcing better wine standards already are before the legislature.

"I was astounded to find that California wineries have been allowing the reputation of their wines to suffer by allowing new wine to be sold in competition with aged wines. If a consumer gets new wine without it being so labeled and finds it inferior, then he is apt to blame all California wines," Scallan said.

#### A FISHING FLIGHT

THERE are few places left on the globe where fish can really relax and feel secure. Even the most distant and inaccessible of their hideouts are now brought by airplane and fast ocean liner within easy reach of the sportsman. The fishing flight illustrated above which resulted in a gorgeous catch of unusually large Rainbow trout was staged in Chile, South America, with Thomas Eastman and David Dows, well-known New York sportsmen, as the successful anglers.

The waters off the coast of Chile have long been noted as rich game-fish areas. Some of the country's inland lakes are coming to the front as freshwater fishing fields. Villarica, a lake in southern Chile, in particular, has become such a paradise for the angler that regular excursions from Santiago to Villarica are featured in connection with the new 39-day de Luxe cruises from New York to Chile. One and a half days' fishing in Villarica Lake recently netted a party of four fishermen one hundred and thirty Rainbow trout such as is shown here, averaging from three to five pounds.

## CLEAN CONVENIENT HEALTHFUL HEAT

## AMERICAN OIL BURNING HEATER

• With this new, up-to-date heater you have no wood or coal to lug in —no dirt and ashes to shovel out. It operates automatically, giving you full heating comfort, even in the coldest weather. The construction is the most efficient known. Giant size heating surfaces and long fire travel extract more heat before the hot gases reach the chimney. That gives increased comfort and saves fuel for you.

• To appreciate the beauty of this heater, you must see it. Beautiful baked-on crystalline enamel with gleaming chromium trimmings make this heating appliance a real pride in any home. Why not come in at your first opportunity to look it over? We have other sizes and models, too, at prices that are right.

INSPECTION REPORT  
(Continued from Page 13)

metallization of metal lining. The girls' toilet room is particularly hazardous when fire risks are considered. The only means of egress from this room is through a basement hall past the heater room door, which is not smoke-tight, up a narrow stairway over the heater room, to the rear hall of the building and thence through the front door.

**Conclusions**  
The hazard from normal vertical leads is not great. The roof is not well framed, but the defects could be readily corrected. The fire risk is excessive. At least alternate paths of egress should be provided from all parts of the building and the heater room should be properly separated from the rest of the building. Compliance to modern fire safety standards would also require one-hour fire resistant construction in all halls and stairways.

The building has very little horizontal force resistance and is definitely unsafe in the event of an earthquake of more than minor intensity. Alterations to provide conformity to modern construction requirements amount virtually to complete rebuilding, and it is doubtful whether any considerable expenditure on the building could be economically justified. Educational requirements are beyond the scope of this report, but any building program should be based on educational as well as constructive requirements.

The report of inspection for the Truckee Grammar school has also been received by the trustees and from the report the building is far from satisfactory. The complete report of the inspection of the Grammar school will be published in the next issue.

Roy Feathers Ask for  
Realignment at Summit

Roy Feathers, local barber, has written to John W. Howe, editor of the California highways and public works magazine commenting on the hazardous situation on the Donner Summit and has sent pictures substantiating his statement.

Mr. Feathers' letter was referred to Earl Lee Kelly, director of public works, and Mr. Kelly has the following to say on this subject:

"Receipt is acknowledged of your letter of February 27 addressed to John W. Howe, who has referred same to me, relative to the suggestion for improving alignment at the Donner Summit.

"I wish to thank you for your comments and for the photograph of the hazardous situation. The state realizes that the installation of guard rails and warning signs only partially provide against danger but finds that it is a difficult problem to reconstruct at the one point to properly guard against accidents where drivers do not exercise caution under all conditions.

"This road was built by the U. S. bureau of public roads a number of years ago on standards considered satisfactory at that time. The is characterized by relatively sharp curves and by steep grades and the frequent controls in roadway location are such that a rectification at one point leads to consideration of radical changes over an extensive section. For instance, improvement of one curve shortens alignment with consequent steepening of grade.

"I can assure you that the matter is being held under serious consideration.

"With kindest regards and best wishes, I am,

"Sincerely yours,

"Earl Lee Kelly, director of public works."

Roar of Airplanes Halts  
Filming of Murder Story

Airplanes are needed in an airplane picture, but during the filming of "Murder in the Clouds" the first National production which comes to the Donner Sunday, the roar of airplanes overhead completely ruined the recording of dialogue being spoken in the scene.

The sequence in question was a cafe set beside an airport. Rehearsals having been finished to the satisfaction of everyone, actual filming started, but at that very moment a low flying airplane drowned out the speech of the players.

Several times after when filming was resumed unwelcome airplanes zoomed by and each time it became necessary to take the scene again. Director Ross Lederman was annoyed at the delay, but Lyle Talbot laughed it off with, "Well, this is an airplane picture you know."

The picture is a thrilling drama with baffling murders committed in the air. There is a stirring triangular romance in which Talbot, Ann Dvorak and Gordon Westcott figure.

Metro-Goldwyn-Mayer Co.  
Completes Snow Scenes

The Metro-Goldwyn-Mayer Moving picture company who have been in Truckee for the past two weeks taking snow scenes for the coming picture, "The Age of Indiscretion," completed their work Tuesday and left for Hollywood.

Many of the scenes were filmed along the Truckee-Tahoe highway, Donner Lake and at the Ehrman estate at Lake Tahoe.

Director James McKay has had a company of 10 people working in the picture with Miss Vivian Taylor doubling for Mae Robson, one of the stars in the picture and Glen Taylor substituting for David Holt, juvenile actor, who is also one of the principal actors in the picture. Even Flush, the spaniel which won fame in the picture "The Barrets of Wimpole Street" and who has a prominent part in this picture has a double who has been used in the scenes filmed here.

The two film companies have been of great benefit to the community giving many of the local people employment and giving considerable business to the business establishments.

The directors of the companies have expressed themselves as well pleased with the snow conditions and the scenery which was exceptionally fine for the scenes they desired.

At the Chamber of Commerce meeting held last Monday C. B. White, president, appointed a committee composed of Wm. Englehart, A. P. Leitch and Frank Gaiennie to see what could be done about making contacts for future movie picture companies to come to Truckee.

It is reported that the R. K. O. Moving Picture company will have a company here within a few days to film snow scenes for a picture now being made.

No Additional Aid to Be  
Available Until March 15

SACRAMENTO, March 14 (UP)—Relief of destitution due to unemployment in California cost governmental agencies \$124,000,000 between January 1, 1934, and February 28, 1935, and funds still are being expended at the rate of more than \$12,000,000 a month for the benefit of more than 1,000,000 persons.

Briefly this is the financial picture of relief needs as seen by F. Y. McLaughlin, state emergency relief administrator.

Of the relief funds spent to date more than \$104,000,000 was advanced by the federal government, the remaining being furnished by state and local agencies. As a result, federal relief officials have announced no additional aid will be available until March 15.

Between the present time and May 15 the state will have to carry its own relief load, a task which will exhaust returns from the \$24,000,000 bond issue available after April 11. Meanwhile the legislature authorized the loan of special funds to the relief treasury until bond money begins to come in, officials explained.

Need of additional money to carry on the current relief program was cited by McLaughlin as the reason for opposition to passage of a bill in the legislature calling for use of \$6,000,000 of bond funds for support of self-help co-operative programs.

As a substitute, relief officials pointed out that the relief commission had under consideration a co-operative program, which, if finally approved, would be financed over a period of one year by means of special federal funds.

This program contemplates the division of the state into a north and south district, with between 20 and 30 co-operatives set up in these areas along agricultural and domestic utility lines.

This program, it was estimated, can care for at least 6000 families and may be the basis of a gradual shift toward a self-help type of relief.

H. I. Snider Attends  
Snow Survey Conference

H. I. Snider, district ranger, attended a meeting held in Reno at the Agricultural Experimental station Tuesday evening with Dr. J. E. Church presiding and at which Dr. Hayes of the rivers and floods division of the U. S. weather bureau from Washington spoke on snow surveys. Dr. Hayes is obtaining information relative to snow surveys which may be conducted in this section each winter. Representatives from the Truckee-Carson Irrigation district, Sierra Pacific Power company and forestry officials were among those present who are interested in such a survey.

Mrs. W. F. Wilkie returned home Tuesday from San Francisco where she has been receiving medical attention for the past few months. Mrs. Wilkie is well on the road to recovery.

**LOST—WHITE GOLD WATCH** — with initials A.M.H. on back. Reward if returned to Mrs. H. C. Rawlings, Reno, Nev.

Mrs. A. R. Ghirard and daughters, Ione and Joan, and Mrs. V. Cozzallo and Julia Cozzallo returned this week from San Francisco where they spent the past month.

George Andrich who has been under the care of Dr. J. H. Bernard for a severely burned hand, is reported as getting along nicely.

The Ladies Aid of the Methodist church will meet this afternoon at the parsonage for their regular meeting.

Dairy Products Still  
Bringing High Returns

SACRAMENTO, March 14 (UP)—California dairy products are bringing the highest returns of any period during the last four years, according to the state department of agriculture.

The wholesale price of 92 score butter on March 4 was 31½ cents per pound in San Francisco as compared with 24 cents a year ago. California cheese was up three cents to 16½ cents a pound.

As prices advanced, storage stocks have decreased, with butter holdings down to 2555 pounds in San Francisco as compared with 1,588,118 pounds in storage during March, 1934.

LEGAL NOTICE

NOTICE OF ELECTION  
for  
Elementary School Trustee

Notice is hereby given to the Electors of Truckee Elementary School District of Nevada County, California, that the Annual Election for School Trustee for Truckee Elementary School District will be held at the Truckee Grammar School house in said district on the last Friday in March, viz, March 29, 1935.

Daryl Gaiennie who is stationed at the naval training station at San Diego, arrived at the home of his parents Wednesday night for a furlough.

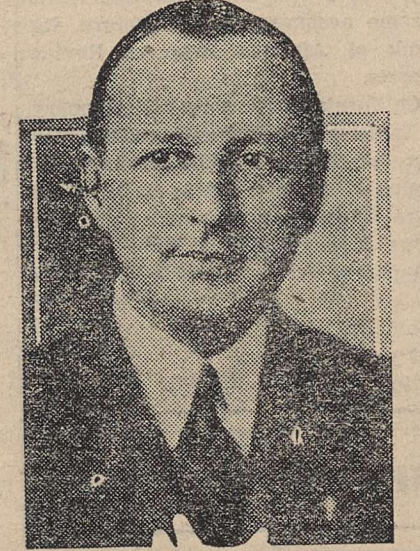

Californians Can  
Brag Some More

SACRAMENTO, March 14 (UP)—Something more for chambers of commerce to brag about—California leads the nation in mackerel catching.

This was revealed in a report of George D. Nordenholt, state director of natural resources. During 1934, according to the report, 113,000,000 pounds of mackerel were taken in California waters.

The total for the entire Atlantic coast during the same period was reported as 136,000,000 pounds.
